

## Engine Oil & Filter

---

14. Start the engine and let it idle for 3—5 minutes.
15. Stop the engine and wait 2—3 minutes.
16. Hold the motorcycle upright and check that the oil level is at the upper level mark in the engine oil inspection window (page 105).
17. Check that there are no oil leaks.
18. Install the oil filter guard, washers and bolts. Tighten the bolts securely.

If a torque wrench is not used for installation, see your dealer as soon as possible to verify proper assembly.
