

- !e Press the **SET** button. The trip distance is set, and the display will return to the ordinary display.

The trip distance will not reset when you complete setting of the subtraction trip by pressing the **SET** button only or when you set the trip distance to the same as the current distance.

When entering the setting mode using "km" unit after setting the trip distance to "626 mile" or more with the unit set to "mile", "----" will appear.

Press the **3** (up) button or the **4** (down) button to display "000.0", and then set the trip distance again if necessary.

Pressing the **SET** button while "----" is displayed will return the display to the ordinary display and keep the previous trip distance.
