With the engine stop switch at RUN and the transmission in neutral, the engine can be started.

- 1. With the transmission in neutral, release the parking brake, but continue squeezing the rear brake lever.
- 2. With the throttle closed, raise the shift lever one full stroke to shift into 1st (first) gear.
- 3. Release the rear brake lever and increase engine speed by gradually opening the throttle.
- 4. When speed increases, release the throttle and shift to 2nd gear by raising the shift lever one full stroke.
- 5. Repeat this sequence to progressively upshift to 3rd and 4th (top) gear.
- 6. To downshift, reverse this sequence. Remember to close the throttle each time you shift to the next lower gear.
